1. Read the passage. Then answer the question 'Heritage' is what we inherit from the past, live within the present and then pass on to our children or future generation. Our unique source of life and inspiration is our cultural and natural heritage. When we speak of World Heritage', it indicates places and sites that we inherited from the past and pass on to the future generation of the entire world. 'The Shat Gambuj Mosque' in Bagerhat is such a heritage. It became a UNESCO World Heritage site in 1985. Originally, the historic Mosque city was known as 'Khalifatabad'. It is situated at the outskirts of Bagerhat town-not very far from the dense Mangrove forest of the Sundarbans. Khalifatabad was a Muslim colony. It was founded by the Turkish general, a saint warrior Ulugh Khan Jahan in the 15th century. The infrastructure of the city reveals significant technical skills in many Mosques as well as early Islamic monuments. Baked bricks were used for the construction of the buildings. The planning of the city was dominated by the tradition of Islamic architecture and the decorations were a combination of Mughal and Turkish architecture. Khan Jahan built a network of roads, bridges, public buildings and reservoirs to make the city habitable. There were about 360 mosques in the city. Among them the most remarkable is the multi-domed Shat Gombuj Mosque. The mosque is unique in the sense that it has 60 pillars that support the roof, with 77 low height domes. The 4 towers at 4 corners have smaller domes at the top as well. The vast prayer hall has 11 arched doorways on the east and 7 each on the North and South for light and ventilation. It has 7 aisles running along the length of the Mosque and 11 deep curves between the slender stone columns. These columns support the curving arches created by the domes. The thickness of the arches is 6 feet and have slightly narrowing hollow and round wall. The west wall in the interior has 11 'Mihrabs' (niche in mosque pointing towards Makkah). These mihrabs are decorated with stone work and terracotta. The floor of the Mosque is made of brick. Besides being used as a prayer hall, Khan Jahan used the Mosque as his court too. Today, it is one of the greatest tourist attractions and one of the best architectural beauties of Bangladesh. Answer the following questions:

2. Choose the correct answer from the alternatives :

3. What is World Heritage?

4. What does the infrastructure of the city reveal?

5. How was the Mosque used?

6. Why is the Mosque unique?

7. What did Khan Jahan do to make the city livable?

8. Read the following text and fill in each gap with a suitable word based on the information of the text. The internet technology has helped design a large number of web sites to facilitate social relations among people around the world. These are known as social networking services or social networks or social media. At present, facebook is the most popular social media site. Google +, Twitter, Linked In, etc. are other frequently used social services. Social network services are web-based and hence, provide ways for the users to interact through the internet. These services make it possible to connect people across the borders and thus have made the users feel that they really live in a global village. Why are social networks expanding so fast? The answer is simple. Most of the social services are cost-free. You can make use of them free, paying a very little to your internet service provider. With the development of internet technology, a number of websites, have been designed to promote the relations (a) _____ the people of the world. By (b) _____ these social media, we can share (c) _____ ideas with each other and feel (d) _____ the citizen of a global village. (e) _____ Social Media are expanding rapidly for their no or low cost.

9. Read the passage carefully and answer the question Stephen Hawking is considered the greatest physicist after Einstein. He was born in England in 1942. He was very skilled in Mathematics from an early age. He wrote the book 'A Brief History of Time: From the Big Bang to the Present Times' in 1988. In this book, he explained cosmology for the general public. It became famous and established his reputation as a great scientist. He received his Ph.D. in cosmology from Cambridge University in 1968. But fortune did not favour him. In 1972, he became a victim of Gehrig's disease. Since then, he had been confined to a wheel chair with no power to control his body. But he continued his teaching through the help of computer. In 1974, he won the prestigious Albert Einstein award for Theoretical Physics. In 1979, he joined Cambridge University as Lucasian Professor of Mathematics. He carried out his research work using his computer. This great scientist breathed his last on 14 March, 2018.
