

English First Paper

শ্রেণি: এসএসসি (SSC) • বোর্ড: সিলেট বোর্ড • সাল: 2025 • ধরন: বোর্ড পরীক্ষা (Board Exam)

বহুনির্বাচনি প্রশ্ন (MCQ) - ৪ টি

1. What is the major problem with fossil fuels?

(ক) They are constantly replenished.

(গ) They are free of cost.

(৫) Solar energy

(৭) Hydroelectric energy

(৯) Carbon

(১১) Hydrogen

(১৩) Unlimited

(১৫) Renewable

(১৭) Depleted

(১৯) Destroyed

(২১) Decreased global temperatures

(২৩) Enhanced solar energy

(২৫) Solar energy

(২৭) Earth's internal heat

(খ) **They cause global warming.**

(ঘ) They do not pollute air.

(৬) Geothermal energy

(৮) Wind energy

(১০) Oxygen

(১২) Nitrogen

(১৪) Limited

(১৬) Constant

(১৮) Restored

(২০) Washed

(২২) Increased air pollution

(২৪) Reduced geothermal activity

(২৬) Wind energy

(২৮) Ocean waves

সঠিক উত্তর: (খ)

2. What is the major problem with fossil fuels?

(ক) They are constantly replenished.

(গ) They are free of cost.

(খ) **They cause global warming.**

(ঘ) They do not pollute air.

সঠিক উত্তর: (খ)

3. What is produced when water vapour turns into rain or snow and flows downhill?

(ক) Solar energy

(গ) **Hydroelectric energy**

(খ) Geothermal energy

(ঘ) Wind energy

সঠিক উত্তর: (গ)

4. What is the most abundant element in nature identified as a renewable energy source?

(ক) Carbon

(গ) **Hydrogen**

(খ) Oxygen

(ঘ) Nitrogen

সঠিক উত্তর: (গ)

5. What does 'finite' mean in the context of energy resources?

(ক) Unlimited

(খ) **Limited**

(গ) Renewable

(ঘ) Constant

সঠিক উত্তর: (খ)

6. What does 'replenished' mean regarding renewable energy sources?

(ক) Depleted

(খ) **Restored**

(গ) Destroyed

(ঘ) Washed

সঠিক উত্তর: (খ)

7. What is a direct polluting impact of fossil fuels on the environment?

(ক) Decreased global temperatures

(খ) **Increased air pollution**

(গ) Enhanced solar energy

(ঘ) Reduced geothermal activity

সঠিক উত্তর: (খ)

8. What does 'geothermal' refer to in the passage?

(ক) Solar energy

(খ) Wind energy

(গ) **Earth's internal heat**

(ঘ) Ocean waves

সঠিক উত্তর: (গ)

1. Read the passage. Then answer the questions Countries of the world rely heavily on petroleum, coal and natural gas for their energy sources. There are two major types of energy sources: renewable and non-renewable. Hydro-carbon or fossil fuels are non-renewable sources of energy. Reliance on them poses real big problems. First, fossil fuels such as oil, coal, gas etc. are finite energy resources and the world eventually will run out of them. Secondly, they will become too expensive in the coming decades and too damaging for the environment. Thirdly, fossil fuels have direct polluting impacts on earth's environment causing global warming. In contrast, renewable energy sources such as, wind and solar energy are constantly and naturally replenished and never run out. Most renewable energy comes either directly or indirectly from the sun. Sunlight or solar energy can be used for heating and lighting homes, for generating electricity and for other commercial and industrial uses. The sun's heat drives the wind and this wind energy can be captured with wind turbines to produce electricity. Then the wind and the sun's heat cause water to evaporate. When the water vapour turns into rain or snow and flows downhill into rivers or streams, its energy can be captured as hydroelectric energy. Along with the rain and snow, sunlight causes plants to grow. Plants produce biomass which again can be turned into fuels such as firewood, alcohol, etc. that are called bioenergy. Scientists have identified hydrogen as another form of renewable energy source.. It is the most abundant element in nature. But it does not exist separately as a gas. It is always combined with other elements, such as with oxygen to make water. Hydrogen, separated from another element, can be burned as a fuel to produce electricity. Our Earth's interior contains molten lava which gives off extreme heat. This heat inside the earth produces steam and hot water which can be used as geothermal energy to produce electricity for heating homes, etc. Ocean energy comes from several sources Ocean's force of tide and wave can be used to produce energy. The surface of the ocean gets more heat from the sun than the ocean depths. This temperature difference can be used as energy source too. Answer the following questions:

2. Choose the correct answer from the alternatives :

3. What can sunlight be used for?

4. What is biomass, and how is it turned into bioenergy?

5. Why is reliance on fossil fuels problematic?

6. How can the ocean's force of tide and wave be used to produce energy?

7. Explain in 2 or 3 sentences why fossil fuels are considered finite energy resources?

8. Read the following text and fill in each gap with a suitable word based on the information of the text: Yoga is a kind of posture and breathing exercise. It brings together physical and mental disciplines to achieve peace of body and mind, helping you relax and manage stress and anxiety. Traditional yoga puts emphasis on behaviour, diet and meditation. But if you're just looking for better stress management and not an entire lifestyle change yoga can still help. Yoga trainers gradually choose easier to complex activities for practitioners. However, all practitioners do not necessarily need the same kinds of practice. Yoga is a form of exercise (a) _____ includes specific body positions and breathing methods. It combines physical and mental (b) _____ to help achieve harmony between body and mind. This practice is effective in reducing stress and (c) _____. Traditional yoga places importance on diet, (d) _____ and meditation. However, not every (e) _____ requires the same type of practice.

9. Read the passage about Abraham Lincoln and complete the following table with information from the passage: Abraham Lincoln was the 16th President of the USA. He is renowned for his Gettysburg Address, delivered during the American Civil War on November 19, 1863. Lincoln was born on February 12, 1809 in Kentucky, USA. His parents hailed from Virginia. In 1819, his mother passed away, prompting his father to move the family to Indiana, where Lincoln grew up. He served as a captain in the Black Hawk War. In 1860, he was nominated for the presidency and was elected as the President of the USA in 1861. Lincoln famously issued the Emancipation Proclamation, declaring a ban on slavery in America on January 1, 1863. He was re-elected in 1864. Tragically, on Good Friday, April 14, 1865, he was assassinated at Ford's theatre in Washington D.C.

10. Name of Events Place Year/Time Born (i) _____ February 12, 1809 (ii) _____ Gettysburg November 19, 1863 Declared ban on slavery the USA (iii) _____ Became the President (iv) _____ 1861 (v) _____ Washington D.C. April 14, 1865

11. Write a summary of the above passage in your own words:

12. Match the parts of the sentences given in column 'A', 'B' and 'C' to write five complete sentences:
 Column A Column B Column C (a) Truthfulness (i) tomorrow it will (i) the respect of others. (b) We must (ii) will never win (ii) all human virtues. (c) Otherwise, we (iii) cultivate the habit (iii) come to light. (d) We know that a lie (iv) is the greatest of (iv) of speaking the truth. (e) Today or (v) never lies (v) hidden for long.

13. Put the following parts of the story in correct order to make the whole story. Only the corresponding numbers of the sentences need to be written. (a) Saadi set out for the palace wearing an ordinary dress and stopped at a courtier's house on the way to spend the night. (b). On his way back, Saadi again stopped at the same house but this time he wore a rich dress. (c) The courtier realized his mistake and apologized to him. (d) One day, the emperor invited him to his palace. (e) Instead of eating Saadi started to put the food into his pockets, saying that his dress deserved it. (f) Sheikh Saadi was a great Persian poet who would lead a simple life. (g) The courtier then welcomed him warmly and served him delicious food. (h) The courtier considered him as an ordinary person and did not.. treat him.well.

14. Answer the following questions to write a paragraph on 'The Importance of Co-curricular Activities in a School'. (a) What are the co-curricular activities?. (b) Why are they important in a school? (c) How do they help with learning? (d) How do they help students grow personally? (e) How do they prepare students for the future?
